EXPERIENCE

FRONT-END DEVELOPER

SEPTEMBER 2025 - PRESENT

WordPress • SCSS • JavaScript • PHP • SEO • Figma • Jira

ESUMO, WARSAW, POLAND

- Collaborating with designers, developers, and clients to deliver scalable digital products based on Wordpress.
- Implementing responsive web design (RWD) principles across projects.
- Improving website performance, accessibility, and user experience.

FRONT-END DEVELOPER

React • TypeScript • TanStack Query • React Hook Form • Tailwind • Git

APR 2025 - SEPTEMBER 2025

PRIMEA STUDIOS, GOTHENBURG, SWEDEN

- Developed modern, responsive web applications using React and TypeScript, with a strong focus on performance, scalability, and maintainable code.
- Built reusable and modular UI components while following component-based architecture and frontend best practices.
- Integrated REST APIs and managed asynchronous server state with TanStack Query to provide efficient data fetching and caching.
- Collaborated closely with designers and backend developers to deliver intuitive user experiences and ensure seamless integration of frontend and backend solutions.

FRONT-END DEVELOPER

WordPress • SCSS • JavaScript • PHP • SEO • Figma

JUN 2024 - PRESENT

RHYCRAFT, GRABS, SWITZERLAND

- Developing and maintaining responsive WordPress websites by translating Figma designs into clean and SEO-friendly code using HTML, JavaScript, and SCSS.
- Collaborating directly with clients to deliver tailored solutions.

FRONT-END DEVELOPER

WordPress • HTML • SCSS • JavaScript • PHP • Git

JUN 2022 - APR 2025

STUDIO CREATIVA/DOCK CODES, GDANSK, POLAND

- Creating WordPress web applications using custom templates.
- Developing optimized, SEO-friendly code.
- Taking into account the principles of responsive web design (RWD).

- React Hook Form
- React Router
- Material UI

Styling:

- Tailwind CSS

CMS:

- WordPress
- Webflow

Tools:

- Git
- Figma
- Cursor
- Chat GPT
- Gemini

Backend:

- SupaBase
- FireBase

PROJECTS

- **Eisenhower Matrix Productivity App**

React • TypeScript • TanStack Query • React Hook Form • React Router • React Hot Toast • SupaBase • Tailwind • Git

A gamified task management application based on the Eisenhower Matrix that helps users prioritize tasks, stay organized, and boost productivity through a points and rewards system. Built with React, TypeScript, TanStack Query, Supabase, and Tailwind CSS, the application includes authentication, CRUD operations, responsive design, and PWA support. It demonstrates modern frontend development practices, including state management, form handling, routing, and seamless backend integration.

- **Gym Tracker**

React • TypeScript • TanStack Query • React Hook Form • React Router • SupaBase • Tailwind • Git

A gym workout tracking application that helps users log training sessions, manage exercise libraries and templates, track personal bests, and review progress through history and analytics charts. Built with React, TypeScript, Vite, TanStack Query, Supabase, and Tailwind CSS, the app includes authentication, CRUD for workouts and exercises, multilingual support (EN/PL), unit preferences, responsive design, and PWA support. It demonstrates modern frontend practices, including context-based state management, form handling, protected routing, and seamless backend integration with optional cloud persistence.

LANGUAGES

- Polish: Native
- English: Advanced (B2/C1)
